

→ Precision Laser Cutting

At Barclay Engineering, we offer precision CNC laser cutting using our advanced Bystronic Byspeed 3015 4KW Ceramic Fiber Laser Cutter. This state-of-the-art machine ensures high-quality, accurate results for projects of all sizes, including custom designs.

Our services are perfect for producing machinery components and structural steel for industries like construction, mining, agriculture, and defence.

Based in Perth, our team handles everything from detailed patterns to heavy-duty tasks, with fast turnaround times, minimal waste, and consistent quality. We offer laser cutting for materials ranging from 1mm to 16mm thick, with a bed size of 1500mm x 3000mm.

Industrial Laser Cutting

Whether you supply CAD files, detailed technical drawings, or physical samples for reverse engineering, our experienced team and advanced internal systems are equipped to seamlessly adapt to your project requirements.

We specialise in high-precision laser cutting for:

Construction: Frames, brackets, fencing, custom gates, and signage

Mining: Machinery parts, drill rig components, loader and excavation parts

Agriculture: Machinery brackets, blades, connectors, and more

Materials We Laser Cut

Specialised Engineering Solutions

We offer expert laser cutting across a broad range of materials, including:

- ▶ Stainless Steel (304 & 316)
- ▶ Mild Steel (GR250, GR350, GR450)
- ▶ Hardox
- ▶ Aluminum
- ▶ PGI Sheet
- ▶ BIS400

We also provide on-site installation as part of our end-to-end service.

Decorative and Residential Screening

Enhance your building's appearance with custom architectural screening. Choose from our in-house collection of patterns and styles, or provide your own concept or design theme.

These precision-cut screens are ideal for:

- ▶ Building facades
- ▶ Residential signage
- ▶ Custom fire pits

We collaborate with architects, designers, and builders to deliver screening solutions that are both aesthetically appealing and functionally effective.

To complete the look, we offer a range of finishing options, including:

- ▶ Powder coating
- ▶ Rust treatments
- ▶ Painting in various colours
